The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bjork 3,080,268. Bjork teaches a lightweight core 12 (could be foam), channel elements 11 (figure 4) and a length of covering 13 (could be corrugated cardboard). To provide a pair of core elements rather than one as a mere duplication of parts for the purpose of providing a larger panel would have been obvious for one having ordinary skill in the art at the time of the invention.

Claims 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar shelves (or shelf elements) are illustrated by Rutz 5,208,084; Worrallo 4,308,963; Burnes 3,606,508; Campbell et al. 3,173,826.
